

Modular Classrooms that Sound Great Walnut Hills School in Cincinnati, OH

Custom acoustic treatments make these modular facilities ideal music rooms

This 16-plex project totals 16,240 sq ft of classroom space. The project features 2 separate buildings that house large ensemble as well as individual practice spaces and instrument storage rooms.

These buildings will be used for the music department during school renovations for 18 months and then will be converted to a cafeteria and additional office space.

Several interior enhancements went into this building to assure it was a suitable music environment. Sound-dispersing ceiling panels, sound-dampening door trim, angled walls for sound control, and raised ceilings enhance the acoustic qualities of the modular classroom.

Experience You Can Trust - Quality You Demand

When time is of the essence, the quick construction time of modular buildings make them ideal for temporary or permanent educational applications. Pac-Van offers flexible lease or purchase plans. Learn more about our modular schools at: www.pacvan.com/modular-schools
