

# Modular Residential Sales Office

## Temporary Residential Sales Office

This residential sales office was designed as a relaxed, non-business atmosphere. It is comprised of 4 - 12' x 56' modules that are positioned one in front of the other with a covered walk between. An open floor plan with comfortable furniture eliminates any sense of pressure associated with sales. Photo wall murals depicting people enjoying leisure activity in neighborhood settings designed from the interior elevation drawings and installed to add to the cheerful nature of the facility. A mock kitchen using the builder's package appliances and fixtures supports the homey feeling while allowing for viewing and selection. The rear building, a used lease fleet 2-plex was modified into a recreation/fitness room for use by residents prior to the completion of a permanent facility. The façade and covered porch, designed in residential style, complete the curb appeal of this modular residential home sales facility. This project was completed in just 40 days!

### Experience You Can Trust - Quality You Demand

When time is of the essence, the quick construction time of modular buildings make them ideal for sales offices. Pac-Van modular buildings are built from the same durable materials as traditional construction and meet all prevailing state codes.
