

Modular Classrooms - Litchfield Schools

Modular school buildings: Occupy 50% sooner and save up to 40% of cost vs "stick-built" construction

This project included 11,788 square feet of classroom and break room space encompassing 7 different buildings for Litchfield Schools. The warm, earth-toned, colors were chosen to blend with the desert surroundings and to coordinate with the similar coloration of the main campus building. The red ramps and steps were chosen to help create a playful atmosphere for the students. We included a staff restroom, eating area and phone lines all within the same locale. The student's restroom was designed to be centrally located along with the teachers break room.

This project was completed in under 30 days to meet the schools timeline. This fast deployment time is one of the main advantages of Pac-Van modular buildings.

Experience You Can Trust - Quality You Demand

When time is of the essence, the quick construction time of modular buildings make them ideal for temporary or permanent educational applications. Pac-Van offers flexible lease or purchase plans. Learn more about modular buildings at:
