

Modular Residential Sales Offices

Premier Investments Condominium Model

Las Vegas, NV

This modular building exemplifies the quality and style of its stick built counterpart. The interior layout is identical to the product that it represents in every way. The taped and textured interior walls mimic the old southwestern architecture with heavy troweling and deep toned wall colors. The spacious great room includes a corner fireplace, oversized sliding glass doors, and an island with a bar. The weathered stucco finished exterior blends with the existing buildings on site. A parapet with 12" crown mold conceals the roof mount HVAC system. All this and completed in under 45 days.
