

# Modular Residential Sales Offices

## Premier Investments Condominium Sales Office & Lounge

*Las Vegas, NV*

Originally used as a construction office and then a classroom, this modular 2-plex was transformed into a beautiful sales office by the use of exterior treatments & pit setting the buildings. By utilizing an existing structure, the customer saved money and occupied the facility quicker.

This modular building has been architecturally enhanced with a custom stucco exterior that appears weathered to match other buildings on site. The interior layout is open to allow the occupants ample room to accommodate the sales activities of both the rep and client. Double French entry doors were added to complete the theme of the site. The building was pit set to allow for easy accessibility and landscaping.

The building was originally built for a commercial contractor as a construction office. It was then re-used as a classroom while the Montessori School's permanent facility was being built.
