

Modular Classrooms for Today & Tomorrow

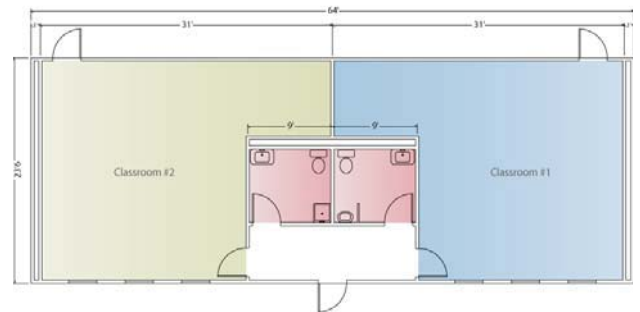

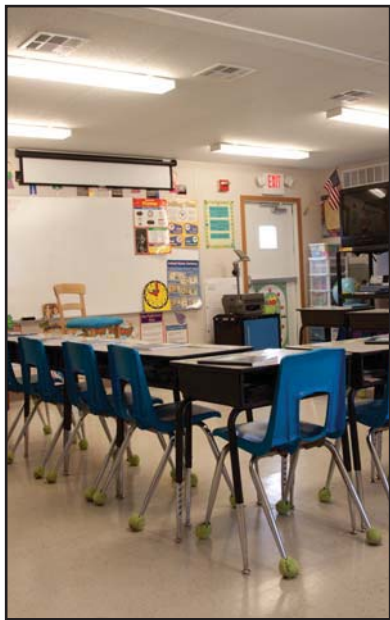

Good Shepherd Catholic School, KY

Pre-construction planning makes room for future modular expansion

This 10-plex project totals 8,160 sq ft of classroom space. The project features a 1,632 sq ft full-scale library, a 1,632 Sq ft Pre-K classroom and 4,896 sq ft of classroom space for 1st – 12th grades.

The buildings are constructed with perimeter framing using standard floor joists and walls. These five buildings were constructed with four of the modular buildings strategically placed high with a center concrete courtyard for outdoor activities. The students are able to step outside their classroom door and head straight into the courtyard.

Pac-Van turnkey project management ensured proper installation of the buildings by coordinating all of the subcontractors including concrete masonry, plumbing, electrical and modular set up crews.

Experience You Can Trust - Quality You Demand

When time is of the essence, the quick construction time of modular buildings make them ideal for temporary or permanent educational applications. Pac-Van offers flexible lease or purchase plans. Learn more about our modular schools at: www.pacvan.com/modular-buildings
