

Press Boxes - Danville Consolidated School Corp.

Modular sports and recreation facilities: Quick, cost-effective permanent or temporary solutions

This 340 sq ft stackable modular building was constructed for the Danville High School Football field. The structure is comprised of 2 separate units, 1-10x30 and 1-8x10. This unit was shipped and crane lifted into place the same day. It sits high atop a structural steel mezzanine built just behind the existing bleachers.

Features include an interior stair to a Hatch Door, which opens onto the top deck. The interior provides workspace and electrical hook up for the press along the entire length of the unit, and another 18' of locking storage doubling as a platform for second row seating inside. The top unit is equipped with a Raynor Roll door for camera use, and 2 exterior steel doors.

Experience You Can Trust - Quality You Demand

When time and budget are of the essence, the flexibility of modular construction is ideal for specialized applications. Pac-Van offers flexible lease and purchase plans. Learn more about modular buildings at: www.pacvan.com/modular-buildings
